Any document you create for your law firm can be created quickly without having to retype client data entered earlier for a different document.

1. Simply choose the document you want to generate.
2. Enter the data in the highlighted fields has not already been added for the case in another document at another time.
3. Click here to generate the document or create a word document or PDF for electronic filing or correspondence.

- *If your document needs some editing for special cases, the documents can be sent into a Word document for changes.*
- *Systems can do calculations.*
- *Systems can be customized to generate ANY document you need.*
- **we offer training for all that we provide at \$95 per hour**
